Clearing the Air about Vaping

Tuesday, November 12, 2019 @ 6:30 pm
Montgomery Township Community Center
1030 Horsham Rd, Montgomeryville, PA 18936

Kids are wired to try new things. The current trend, both nationally and locally, is vaping. Along with other risky behaviors, this is something we need to have a conversation about, as parents and as a community that cares.

- We’ll discuss ways we can help kids to break away from cultural pressures.
- The teenage brain is built to take risks. How can we encourage smart choices?
- Vaping can involve flavored liquids, nicotine, or cannabis.

We’ll learn about the implications of each. We’ll be joined by Patrick Dowling, LPC, a licensed clinician who works with adolescents and young adults. We will also be joined by a prevention specialist from Caron Treatment Center.
